

March Meeting 2008

Session Index

Session A

- [A1. Spectroscopy of Two-Dimensional Electronic Systems](#)
- [A2. New Developments in HTSC I](#)
- [A3. Frontiers in Computational Materials](#)
- [A4. Polymers at Surfaces: Adhesion, Tribology and Patterning](#)
- [A5. Supersolid 4He: A New State of Matter](#)
- [A6. Novel Channel Materials for CMOS Technology](#)
- [A7. Oscillations Without Transcription in Vivo and in Vitro](#)
- [A8. Colloidal Self-Assembly I](#)
- [A9. Focus Session: Fluid Dynamics of Animal Motion](#)
- [A10. Tunneling on Cuprate Superconductors](#)
- [A11. Focus Session: MgB₂-like: Exotic Behavior in MgB₂-like Materials](#)
- [A12. Strongly Correlated 1D Systems](#)
- [A13. Focus Session: Simulations of Matter at Extreme Conditions I: Hydrogen Helium, and Planetary Materials](#)
- [A14. Focus Session: Quantum Simulation of Condensed Matter Systems With Ultracold Atoms](#)
- [A15. Focus Session: Theory of Magnetization Dynamics](#)
- [A16. Dynamics of Nucleic Acids](#)
- [A17. Cold Fusion](#)
- [A18. Focus Session: Multiscale Modeling: Polymers, Nanocomposites, and Biomacromolecules](#)
- [A19. Magnetic and Superconducting Properties](#)
- [A20. Focus Session: Quantum Dots and Semiconductor Surface Nanostructures](#)
- [A21. Focus Session: Reversibly Associating Polymers: Theory and Experiments](#)
- [A22. Focus Session: Hybrid Organic-Inorganic Nanomaterials I: Patterning and Self Assembly](#)
- [A23. Focus Session: Manganites I](#)
- [A24. Focus Session: Transport in Nanostructures I: STM and Atomic Control](#)
- [A25. Block Copolymer Thin Films](#)
- [A26. Focus Session: Photophysics of Cold Molecules I](#)
- [A27. Focus Session: Pyrochlores](#)
- [A28. Focus Session: Optical Properties of Nanostructures I: Carbon Nanotubes](#)
- [A29. Focus Session: Carbon Nanotubes and Related Materials I: Graphene Transport](#)
- [A30. Electronic Properties of Graphene and Related Structures I](#)
- [A31. Focus Session: Oxide Interfaces I](#)
- [A32. Disordered Magnetic Materials](#)
- [A33. Focus Session: Spin Dependent Phenomena in Semiconductors: I](#)
- [A35. Focus Session: Negative Index Materials I](#)
- [A36. Focus Session: X-ray and Electron Optics and Microscopy](#)
- [A37. Semiconductors I: Growth and Processing](#)
- [A38. Focus Session: Biocompatibility](#)
- [A39. Focus Session: Elasticity and Geometry of Thin Objects](#)
- [A40. Phase Stability and Phase Transitions](#)

Session B

- [B1. Strongly Correlated Electrons in One Dimension](#)
- [B2. Magnetism in Semiconductors: New Frontiers](#)
- [B3. Silicon Photonics](#)
- [B4. Self-assembled Macromolecular Structures](#)
- [B5. Geometry and Elasticity](#)
- [B6. Quantum Simulation and Quantum Information Theory in Cold Atoms](#)
- [B7. Gene Regulation](#)
- [B8. Colloidal Self-Assembly II](#)
- [B9. Pattern Formation and Nonlinear Dynamics](#)
- [B10. Gaps, Pseudogaps and Fermi Surfaces in Cuprates](#)
- [B11. Magnetic Properties of Cuprate Superconductors](#)
- [B12. Organic Conductors and Strongly Correlated 2D Systems](#)
- [B13. Focus Session: Simulations of Matter at Extreme Conditions II: Beryllium, Carbon, and Metals](#)
- [B14. Casimir Forces, Collisions and Atomic Structure](#)
- [B15. Quantum Entanglement I](#)
- [B16. Nonlinear Dynamics of Neuronal and Cardiac Systems](#)
- [B17. Lipid Bilayers: Structure and Function](#)
- [B18. Focus Session: Mechanical Properties of Polymers: Fracture and Adhesion](#)
- [B19. Novel Surface Instrumentation and Techniques](#)
- [B20. Focus Session: Growth, Kinetics and Quantum Effects in Metal Thin Films](#)
- [B21. Focus Session: Clusters, Cluster Assemblies, Nanoscale Materials I](#)
- [B22. Focus Session: Organic Electronics: FETs I](#)
- [B23. Focus Session: Perovskite Cobaltites](#)
- [B24. Focus Session: Transport in Nanostructures II: Strong Correlations](#)
- [B25. Polymer Blends](#)
- [B26. Focus Session: Photophysics of Cold Molecules II](#)
- [B27. Focus Session: Molecular Magnets I](#)
- [B28. Focus Session: Optical Properties of Nanostructures II: Graphene, Graphite and Related Materials](#)
- [B29. Focus Session: Carbon Nanotubes and Related Materials II: Graphene Transport](#)
- [B30. Focus Session: Carbon Nanotubes and Related Materials III: Synthesis](#)
- [B31. Focus Session: Computational Nanoscience I: Electronic and Optical Properties of Nanoclusters](#)

[B32. Focus Session: Nanocontacts and Inhomogeneous Magnetic States](#)
[B33. Focus Session: Spin Dependent Phenomena in Semiconductors: II](#)
[B35. Focus Session: Emerging Materials and Devices I](#)
[B36. Focus Session: Advances in Scanned Probe Microscopy I: Low Temperatures](#)
[B37. FQHE in Higher Landau Levels](#)
[B38. Structure, Electronic Properties, Spectroscopy, and Ionic Transport in Insulators](#)
[B39. Focus Session: Collective Dynamics of Self-Driven Particles](#)
[B40. SPS Undergraduate Research and Outreach I](#)

[Session C](#)

[C1. Poster Session I: 2:00 pm - 5:00 pm](#)

[Session D](#)

[D1. Fundamental Developments in Density Functional Theory](#)
[D2. New Developments in HTSC II](#)
[D3. Materials Physics in the Fast Lane](#)
[D4. Probing Spin and Charge States in Semiconductor Quantum Dots and "Molecules"](#)
[D5. Circuit QED: Superconducting Qubits Coupled to Cavities](#)
[D6. Long-Distance Charge Transfer in Biological Systems](#)
[D7. Locomotion in Complex Fluids](#)
[D8. Focus Session: Granular Flows: Vibrated](#)
[D9. Focus Session: Turbulence](#)
[D10. Focus Session: Hybrid Magnetic-Superconducting Systems I](#)
[D11. Inhomogeneous Superconductors and Transport](#)
[D12. Theory of Ferroelectric, Multiferroic, and Other Structural Transitions](#)
[D13. Computational Methods: Strongly Correlated and Many Body Systems](#)
[D14. Quantum Information Science in AMO](#)
[D15. Focus Session: Foundations of Quantum Theory I](#)
[D16. Biological Networks](#)
[D17. Focus Session: Time-Resolved Structural Investigations on Protein Folding and Function](#)
[D18. Polymers at Surfaces](#)
[D19. Focus Session: Dopants and Defects in Semiconductors I](#)
[D20. Focus Session: Growth and Properties of Novel Semiconductor and Related Nanostructures](#)
[D21. Focus Session: Clusters, Cluster Assemblies, Nanoscale Materials II](#)
[D22. Focus Session: Organic Electronics: Synthesis and Materials](#)
[D23. Focus Session: Triangular Lattice and Spinels](#)
[D24. Superlattices and Nanostructures: Electronic Properties I](#)
[D25. Theory and Simulations I](#)
[D26. Focus Session: Photophysics of Cold Molecules III](#)
[D27. Focus Session: Magnetic Nanowires and Nanodots I](#)
[D28. Focus Session: Transport in Nanostructures III: Single Molecules](#)
[D29. Focus Session: Carbon Nanotubes and Related Materials IV: Graphene](#)
[D30. Focus Session: Carbon Nanotubes and Related Materials V: Nanotube Transport](#)
[D31. Focus Session: Computational Nanoscience II: Nanowires and Transport](#)
[D32. Focus Session: Spin Transfer Torque I](#)
[D33. Focus Session: Spin Dependent Phenomena in Semiconductors: III](#)
[D35. Focus Session: Negative Index Materials II](#)
[D36. Focus Session: Hydrogen Storage I: Chemical Hydride and Complex Metal Hydride Materials I](#)
[D37. Optical Properties of Semiconductors \(mostly nitrides\)](#)
[D38. Metals: Defects and Elastic Properties](#)
[D39. Focus Session: Econophysics and Applications Outside of Physics](#)
[D40. SPS Undergraduate Research and Outreach II](#)

[Session E](#)

[E1. APS Prize and Award Session](#)

[Session F](#)

[F1. Welcome Reception](#)

[Session G](#)

[G1. 25 Years of Scanning Probe Microscopy](#)

[Session H](#)

[H1. Single-Ion Magnetic Moments in Semiconductors](#)
[H2. New Developments in HTSC III](#)
[H3. Polymer Physics Prize](#)
[H4. Selected Applications Using Materials Science](#)
[H5. CeMn5 \(115 \) Heavy Electron Materials: A Rosetta Stone for the Kondo Lattice?](#)
[H6. Understanding Hurricanes and Severe Storms: Patterns, Prediction and Mitigation](#)
[H7. Complex Active Biomaterials: Mechanics and Microrheology](#)
[H8. Focus Session: Glassy Dynamics in Colloids](#)
[H9. Instabilities and Fluid Dynamics](#)
[H10. Josephson Effects](#)
[H11. Focus Session: MgB2-like: Computational Design of Novel Superconductors](#)
[H12. Lattice and Magnetic Properties of Multiferroics](#)
[H13. Focus Session: Simulations of Matter at Extreme Conditions III: Classical MD, Potentials, and Energetic Materials](#)
[H14. Cold Gases: One Dimensional Phenomena](#)
[H15. Focus Session: Superconducting Qubits I](#)
[H16. Focus Session: Biochip Physics I](#)
[H17. Proteins: Structure and Function](#)
[H18. Block Copolymers in Solution and Blends](#)
[H19. Molecules on Surface: Structure](#)
[H20. Focus Session: Assembly of Nanowires and Related Structures](#)
[H21. Focus Session: Clusters, Cluster Assemblies, Nanoscale Materials III](#)
[H22. Electrically and Optically Active Polymers](#)

[H23. Focus Session: Probing and Modifying Materials with Lasers I](#)
[H24. Focus Session: Optical Properties of Nanostructures III: Functional Nanowires](#)
[H25. Adsorption of Organics on Surfaces](#)
[H26. Focus Session: Photophysics of Cold Molecules IV](#)
[H27. Correlated Electrons: Heavy Fermions and Exotic Magnets](#)
[H28. Photonic Crystals](#)
[H29. Focus Session: Carbon Nanotubes and Related Materials VI: Graphene Transport](#)
[H30. Electronic Properties of Graphene and Related Structures II](#)
[H31. Focus Session: Computational Nanoscience III: Ferroelectrics, Surfaces, and Water](#)
[H32. Focus Session: Magnetic Imaging](#)
[H33. Focus Session: Optical Properties of Magnetic Semiconductors](#)
[H35. Focus Session: Negative Index Materials III](#)
[H36. Focus Session: Advances in Scanned Probe Microscopy II: Force Methods](#)
[H37. Optical Properties of Semiconductors \(mostly oxides\)](#)
[H39. Student Prize Session followed by Focus Session: Friction](#)
[H40. Focus Session: Earth and Planetary Materials I](#)

Session J

[J1. Pake Prize, McGroddy Prizes, Buckley Prize Session](#)
[J2. 50th Anniversary of Physical Review Letters](#)
[J3. Kondo Screening and Quantum Criticality from the Spatial Limit: From Single Spins to Droplets to Lattices](#)
[J4. Panel Discussion: Making the Invisible Scientist Visible: Science in Emergent Countries](#)
[J5. Where is the Center of Mass for Family, Career, and Self?](#)
[J6. Effective Potentials and Force Fields for Simulating Biological Macromolecules](#)
[J7. Undergraduate Nanotechnology and Materials Physics Education I](#)
[J8. Granular Flows](#)
[J9. Fluid Structure and Properties](#)
[J10. Superconductivity: Vortex I](#)
[J11. Focus Session: MgB₂-like: Novel Non-Boride Superconductors](#)
[J12. Experimental Studies of the Heavy Fermion 115 Compounds](#)
[J13. Focus Session: Simulations of Matter at Extreme Conditions IV: Crystalline Solids, Liquids, and Methods](#)
[J14. Focus Session: Berezinskii-Kosterlitz-Thouless Regime and Rotating Quantum Gases](#)
[J15. Quantum Computation](#)
[J16. Focus Session: Biochip Physics II](#)
[J17. Focus Session: General Biological Patterns](#)
[J18. Frank J. Padden Award Symposium](#)
[J19. Focus Session: How to Develop an Education Component for an NSF Proposal](#)
[J20. Focus Session: Electronic and Lattice Properties of Surfaces and Thin Films](#)
[J21. Focus Session: Clusters, Cluster Assemblies, Nanoscale Materials IV](#)
[J22. Organic Electronics, Photonics and Magnetics: Theory](#)
[J23. Focus Session: Cuprates and Nickelates](#)
[J24. Focus Session: Optical Properties of Nanostructures IV: Quantum Dots](#)
[J25. Focus Session: Biopolymers: Molecules, Solutions and Networks I](#)
[J26. Focus Session: Quantum Control I](#)
[J27. Focus Session: Triangular Lattice](#)
[J28. Focus Session: Thermoelectricity in Semiconductor Nanostructures](#)
[J29. Focus Session: Carbon Nanotubes and Related Materials VII: Electronic Properties](#)
[J30. Optical Properties and Experimental Characterization of Graphene and Related Structures](#)
[J31. Focus Session: Computational Nanoscience IV: Nanocrystals](#)
[J32. Focus Session: Damping and Spin Relaxation](#)
[J33. Focus Session: Mostly Spins in Group IV Semiconductors and Organics](#)
[J35. Focus Session: Emerging Materials and Devices II](#)
[J36. Focus Session: Materials for Photovoltaics and Photocatalysis I](#)
[J37. QHE: Bilayers and Graphene](#)
[J39. Focus Session: Friction and Contact](#)
[J40. Focus Session: Earth and Planetary Materials II](#)

Session K

[K1. Poster Session II: 2:00 pm - 5:00 pm](#)

Session L

[L1. Nobel Prize Session followed by Onsager Prize Session](#)
[L2. The Physics of Next Generation Photovoltaics](#)
[L3. The Physics of Climate and Climate Change](#)
[L4. Bosonic Modes in HTSC](#)
[L5. Phase Transitions in Disordered Magnets](#)
[L6. Minorities in Condensed Matter Physics](#)
[L7. Multiscale Phenomena in Biological Physics](#)
[L9. Colloidal Self Assembly and Interactions](#)
[L10. Focus Session: Electronic and Vortex Mechanisms for Higher Performing Superconductors](#)
[L11. Superconductivity: Transport and Fermi Pockets](#)
[L12. Heavy Fermion Theory and Strong Correlations](#)
[L13. Ground State Density Functional Theory: Theory Development](#)
[L14. Focus Session: Foundations of Quantum Theory II](#)
[L15. Focus Session: Progress toward Scalable Quantum Information Processing](#)
[L16. Focus Session: Brownian Motors](#)
[L17. Solid Helium](#)
[L18. Focus Session: John H. Dillon Medal Symposium](#)
[L19. Focus Session: Dopants and Defects in Semiconductors II](#)
[L20. Focus Session: Self-Assembled Organic Overlayers](#)
[L21. Focus Session: Clusters, Cluster Assemblies, Nanoscale Materials V](#)
[L22. Confinement-Induced Structures in Block Copolymers](#)

[L23. Focus Session: Probing and Modifying Materials with Lasers II](#)
[L24. Focus Session: Transport in Nanostructures IV: 2DES, Dots, and QPCs](#)
[L25. Semi-crystalline Polymers](#)
[L26. Focus Session: Quantum Control II](#)
[L27. Focus Session: Low-dimensional Spin Systems](#)
[L28. Material Issues for Superconducting Qubits](#)
[L29. Focus Session: Carbon Nanotubes and Related Materials VIII: Electronic Structure of Graphene](#)
[L30. Metallic and Semiconducting Nanotubes](#)
[L31. Graphene: Atomic Structure and Lattice Properties](#)
[L32. Focus Session: Spin Transfer Torque II](#)
[L33. Focus Session: Spins in Quantum Dots](#)
[L35. Optoelectronic Devices and Applications](#)
[L36. Focus Session: Hydrogen Storage II: Chemical Hydride and Complex Metal Hydride Materials II](#)
[L37. Semiconductors II: Structure and Phase Diagrams](#)
[L39. Focus Session: Deformation and Fracture](#)
[L40. High Pressure](#)

Session M

[M15. GQI Business Meeting](#)
[M16. DBP Business Meeting](#)
[M18. DPOLY Business Meeting](#)
[M23. GSCCM Business Meeting](#)
[M27. GMAG Business Meeting](#)
[M29. GSNP Business Meeting](#)
[M35. FIAP Business Meeting](#)
[M36. GIMS Business Meeting](#)
[M37. DCP Business Meeting](#)
[M38. DCOMP Business Meeting](#)
[M39. DMP Business Meeting](#)
[M40. DCMP Business Meeting](#)

Session P

[P1. Is There Pairing Glue in Cuprate Superconductors?](#)
[P2. Controlling Electron Spins: Propagation and Dynamics](#)
[P3. Simple Views on Bulk Polymers: Symposium Honoring P G de Gennes](#)
[P4. Fluctuations and Rare Events in Physical, Chemical, and Biological Systems](#)
[P5. Quantum Information Meets Gravitation](#)
[P6. Fluid Dynamics and Biology](#)
[P7. Optical Lattices](#)
[P8. Glassy Dynamics](#)
[P9. Microfluidic and Nanofluidic Devices](#)
[P10. Superconducting Nanostructures I](#)
[P11. Focus Session: MgB₂-like: Disorder in Novel Superconductors](#)
[P12. Skutterudites and Other Heavy Fermions](#)
[P13. Time-Dependent Density Functional Theory](#)
[P14. High-Bandwidth Dynamic Atomic Force Microscopy](#)
[P15. Focus Session: Superconducting Qubits II](#)
[P16. Focus Session: Cytoskeletal Dynamics and Cell Motility I](#)
[P17. Quantum Fluids and Solids I](#)
[P18. Polymer Nanocomposites I](#)
[P20. Focus Session: Engineering Interfaces for New Materials I: Internal Interfaces](#)
[P21. Focus Session: Fundamental Issues in Catalysis I](#)
[P22. Focus Session: Organic Electronics: FETs II](#)
[P23. Focus Session: Multifunctional Oxides: BiFeO₃ and Thin Films](#)
[P24. Focus Session: Optical Properties of Nanostructures V: Plasmonics and Metallic Nanostructures](#)
[P25. Focus Session: DNA and Protein Analysis with Micro and Nanofluidics](#)
[P26. Focus Session: Quantum Control III](#)
[P27. Focus Session: Low-dimensional Magnetism](#)
[P28. Superlattices and Nanostructures \(Wires, Dots, etc.\): Optical Properties I](#)
[P29. Focus Session: Carbon Nanotubes and Related Materials IX: Graphene Electronic Structure](#)
[P30. Electronic Properties of Graphene and Related Structures III](#)
[P31. Focus Session: Computational Nanoscience V: Mechanical Properties and General Methods](#)
[P32. Focus Session: Magnetic Media and Hard Magnetic Materials](#)
[P33. Focus Session: Mostly Spin Injection in Si](#)
[P34. Tutorial for Authors and Referees of Physical Review](#)
[P35. Focus Session: Materials for Photovoltaics and Photocatalysis II](#)
[P36. Focus Session: X-ray and Neutron Instrumentation and Science](#)
[P37. Semiconductors III: Electronic and Optical Properties I](#)
[P38. Relaxor Ferroelectrics and Piezoelectrics](#)
[P39. Applications of Complex Networks](#)
[P40. Surface Effects, Thermodynamics and Fabrication](#)

Session Q

[Q1. Ballistic Charge and Spin Transport in Graphene](#)
[Q2. The Physics of Self-Assembled Protein Cages](#)
[Q3. Simple Views on Polymer Dynamics: Symposium Honoring P G de Gennes](#)
[Q4. Pairing Fluctuations Near the Superconductor-Insulator Transition](#)
[Q5. Panel Discussion: How Can Industry Best Support the Innovative Research That It Needs?](#)
[Q6. Artificial and Tunable Realizations of Spin Systems](#)
[Q7. Undergraduate Nanotechnology and Materials Physics Education II](#)
[Q8. Colloidal Phase Behavior](#)
[Q9. Focus Session: DNA and Biofluid Analysis with Micro and Nanofluidic Devices](#)

[Q10. Superconductivity: Vortex II](#)
[Q11. Focus Session: Hybrid Magnetic-Superconducting Systems II](#)
[Q12. Focus Session: Hidden Order and Heavy Fermions](#)
[Q13. Ground State Density Functional Theory: Applications](#)
[Q14. Bosons in Optical Lattices](#)
[Q15. Focus Session: Semiconductor Qubit Approaches I](#)
[Q16. Focus Session: Cytoskeletal Dynamics and Cell Motility II](#)
[Q17. Focus Session: Hydrophobic Interactions at Multiple Scales in Biology](#)
[Q18. Polymer Nanocomposites II](#)
[Q19. Physics Education: In and Out of the Classroom](#)
[Q20. Focus Session: Engineering Interfaces for New Materials II: Surfaces](#)
[Q21. Focus Session: Fundamental Issues in Catalysis II](#)
[Q22. Focus Session: New Methods in Polymer Physics](#)
[Q23. Focus Session: Bilayer Manganites](#)
[Q24. Focus Session: Transport in Nanostructures V: Optics, Mechanics, and Networks](#)
[Q25. Physical Properties of Melts and Solutions](#)
[Q26. Advances in Spectroscopy](#)
[Q27. Focus Session: One-dimensional Spin Chains](#)
[Q28. Focus Session: Thermoelectricity in Bulk Materials](#)
[Q29. Focus Session: Carbon Nanotubes and Related Materials X: p-n Junctions and Mesoscopic Effects in Graphene](#)
[Q30. Nanotubes and Nanowires I: Electronic and Transport Properties](#)
[Q31. Computational Nanoscience: Nanotubes and Graphene](#)
[Q32. Focus Session: Molecular Magnets II](#)
[Q33. Focus Session: Spin Polarization in Compound Semiconductors](#)
[Q35. Focus Session: Emerging Materials and Devices III](#)
[Q36. Focus Session: Advances in Scanned Probe Microscopy III: Force Methods](#)
[Q37. Magnetotransport in 2DEGs](#)
[Q38. Focus Session: Ferroelectric Films and Finite Size Effects](#)
[Q39. Focus Session: Models and Materials Far from Equilibrium](#)
[Q40. Metals: Nanoparticles, Compounds and Thermodynamics](#)

[Session R](#)

[R1. Poster Session III: 1:00 pm - 4:00 pm](#)

[Session S](#)

[S1. Diamond-based Quantum Information Processing](#)
[S2. Can Power Dissipation in a Switch Be Significantly Lowered?](#)
[S3. Aging, Shear and Rejuvenation: Mechanics of Glasses, Colloids and Granular Matter](#)
[S4. Keithley Award Symposium](#)
[S5. Theory of Orbital Magnetization and Related Properties](#)
[S6. Superfluid Density in Underdoped Cuprates](#)
[S7. Panel Discussion: Non-traditional Careers for Physicists](#)
[S8. Colloidal Rheology](#)
[S9. Optical Properties of Superconductors](#)
[S10. Superconductors: Synthesis and Physical Properties](#)
[S11. Theory of Superconductivity in Cuprates I](#)
[S12. Strongly Correlated Quantum Phases](#)
[S13. Focus Session: Frontiers in Electronic Structure Theory I](#)
[S14. Fermions in Optical Lattices](#)
[S15. Superconducting Qubits III](#)
[S16. Focus Session: General Techniques and Radiation Therapies in Biological Physics](#)
[S17. Quantum Fluids and Solids II](#)
[S18. Hybrid Organic-Inorganic Nanomaterials II: Assembly and Fabrication](#)
[S19. Focus Session: Dopants and Defects in Semiconductors III](#)
[S20. Focus Session: Engineering Interfaces for New Materials III: Heterogeneous Interfaces](#)
[S21. Focus Session: Fundamental Issues in Catalysis III](#)
[S22. Focus Session: Organic Electronics: Contacts and Interfaces](#)
[S23. Focus Session: Nanostructured Oxides and Thin Films](#)
[S24. Fullerenes \(not nanotubes\)](#)
[S25. Gels and Elastomers](#)
[S26. Focus Session: Advances in Atmospheric Aerosol Science I](#)
[S27. Focus Session: Magnetic Nanowires and Nanodots II](#)
[S28. Superlattices and Nanostructures \(Wires, Dots, etc.\): Optical Properties II](#)
[S29. Focus Session: Carbon Nanotubes and Related Materials XI: Optical Spectroscopy](#)
[S30. Nanotubes, Transport, and Other Properties](#)
[S31. Focus Session: Multiferroics I: 113 and 125](#)
[S32. Focus Session: Magnetic Tunneling](#)
[S33. Focus Session: Mostly III-V Semiconductors](#)
[S35. Focus Session: Nanotechnology I](#)
[S36. Focus Session: Hydrogen Storage III: Novel Porous and Sorbent Materials](#)
[S37. Effect of Strain on Ferroelectrics](#)
[S39. Systems Far From Equilibrium and Other Topics in Statistical Physics](#)
[S40. History of Physics](#)

[Session T](#)

[T1. Quarks to Cosmos: Breaking News at the Interface of Particle, Nuclear and Astrophysics](#)
[T16. Town Hall Meeting: Materials Physics at Gigabar Pressures](#)

[Session U](#)

[U1. Isakson Prize, Adler Award, Nicholson Medal Session](#)
[U2. Electron Nematics](#)
[U3. Simple Views on Polymers at Surfaces and Interfaces: Symposium Honoring P G de Gennes](#)
[U4. Interferometry in the Quantum Hall Regime](#)

[U5. Epitaxial Oxide/Semiconductor Systems](#)
[U6. Computational and Theoretical Challenges in Predicting Climate Change](#)
[U7. Physics Demonstrations and Strategies for Teaching and Public Outreach](#)
[U8. Colloidal Manipulation Techniques](#)
[U9. Fluctuations, Phase Transitions and the Polar Kerr Effect](#)
[U10. Superconductivity: Magnetic Field Effects](#)
[U11. Focus Session: MgB₂-like: Enhancement of Superconducting Properties](#)
[U12. Strongly Correlated Electron Systems: Quantum Phase Transitions](#)
[U13. Focus Session: Frontiers in Electronic Structure Theory II](#)
[U14. Focus Session: Exotic Phases in Ultracold Fermi Gases](#)
[U15. Focus Session: Open Quantum Systems and Decoherence](#)
[U16. Focus Session: Medical Physics and Radiation Biology](#)
[U17. Proteins in Membranes and the Cytoskeleton](#)
[U18. Focus Session: Polymer Collapse and Protein Folding](#)
[U19. Computational Methods: Dynamics, Transport, and Plasma](#)
[U20. Focus Session: Metal Surfaces, Interfaces, and Thin Films](#)
[U21. Surfaces and Interfaces I](#)
[U22. Focus Session: Nonequilibrium Fluctuations in Biomolecules](#)
[U23. Focus Session: Manganite Thin Films](#)
[U24. Focus Session: Transport in Nanostructures VI: Nonequilibrium Phenomena and Noise](#)
[U25. Theory and Simulation II](#)
[U26. Focus Session: Advances in Atmospheric Aerosol Science II](#)
[U27. Correlated Electrons: Theory, Actinides, and Ising Systems](#)
[U28. Focus Session: Semiconductor Qubit Approaches II](#)
[U29. Focus Session: Carbon Nanotubes and Related Materials XII: Graphene Transport](#)
[U30. Electronic Properties of Graphene and Related Structures IV](#)
[U31. Focus Session: Multiferroics II: Theory and LuFe₂O₄](#)
[U32. Focus Session: Magnetic Multilayers and Nanostructures](#)
[U33. Focus Session: Theory and Simulations of Magnetism I](#)
[U35. Focus Session: Hydrogen Storage IV: Theoretical Predictions](#)
[U36. Nanoinstrumentation for Biological and Other Applications](#)
[U37. Transport Properties of Semiconductors: 2-D Systems](#)
[U38. Focus Session: Ferroelectric Oxide Superlattices and Oxide Thermoelectrics](#)
[U39. Focus Session: Structure and Dynamics of Complex Networks](#)
[U40. Biomolecular Computation](#)

[Session V](#)

[V1. Recent Advances in Soft Complex Materials Using Neutron Scattering](#)
[V2. Facilities for Meeting Grand Challenges](#)
[V3. Industrial Physics History](#)
[V4. Electronic Excitations in Organic Molecular Crystals/Fluctuating Fronts: Beyond a Popular Mean-Field Theory](#)
[V5. Panel Discussion: Lessons Learned from Katrina: How to Prepare a Department for Catastrophic Events](#)
[V7. Oscillations and Segmentation: Dynamical Genetic Regulation in Time and Space](#)
[V8. Liquid Crystals I: Structure and Defects](#)
[V9. Computational Methods: Multiscale Modeling](#)
[V10. Proximity Effect, Electron-doped Cuprates, STM](#)
[V11. Quasiparticle Dispersion and Coupling in Cuprates](#)
[V12. Metal Insulator Transition I: Vanadium Oxides and Others](#)
[V13. Focus Session: Frontiers in Electronic Structure Theory III](#)
[V14. BEC-BCS Crossover](#)
[V15. Quantum Error Correction and Control](#)
[V16. Focus Session: Medical Imaging and Related Technologies](#)
[V17. Focus Session: Nonequilibrium Thermodynamics of Small Systems](#)
[V18. Focus Session: Properties of Block Copolymers](#)
[V19. New Frontiers for Biological Physics](#)
[V20. Phase Transitions: Structural, Electronic, and Magnetic](#)
[V21. Charged and Ion-Containing Polymers I](#)
[V22. Focus Session: Organic Electronics: Molecular Junctions](#)
[V23. Focus Session: Charge/Orbital Ordering in Complex Oxides](#)
[V24. Focus Session: Transport in Nanostructures VII: Si Interfaces and Carbon](#)
[V25. Focus Session: Interfaces and Adhesion I](#)
[V26. Focus Session: Advances in Atmospheric Aerosol Science III](#)
[V27. Focus Session: Frustrated Theory](#)
[V28. Focus Session: Optical Properties of Nanostructures VI: Nanoscale Metamaterials](#)
[V29. Focus Session: Carbon Nanotubes and Related Materials XIII: Synthesis](#)
[V30. Nanotubes and Nanowires II: Other Properties I](#)
[V31. Focus Session: Oxide Interfaces II](#)
[V32. Focus Session: Magnetic Semiconductors and Novel Magnetic Materials](#)
[V33. Focus Session: Theory of Spin Phenomena in Semiconductors](#)
[V34. Panel Discussion: International Gender Issues in Physics](#)
[V35. Focus Session: Thermoelectric Phenomena in Nanostructured Materials](#)
[V36. Advances in Scanned Probe Microscopy IV: Optical and High Frequency Methods](#)
[V37. QHE and FQHE](#)
[V38. Focus Session: Multiferroics and Multiferroic Composites](#)
[V39. Focus Session: Jamming I: Theory](#)
[V40. Nucleic Acids: Structure and Function](#)

[Session W](#)

[W2. Electronic Structure, Magnetism and Superconductivity of Sodium Cobaltate](#)
[W3. Dislocation Patterns and Avalanches](#)
[W4. Dynamics of Polymers](#)

[W5. Sensing Science and Sensors for Industrial Applications](#)
[W6. Strong Interacting Fermi Gases with Spin Asymmetry](#)
[W7. Nonlinear Dynamics of Neural Systems: A Statistical Mechanics of the Brain](#)
[W8. Liquid Crystals II: Dynamics and Topology](#)
[W9. Theoretical Methods and Applications](#)
[W10. Focus Session: Hybrid Magnetic-Superconducting Systems III](#)
[W11. Theory of Superconductivity in Cuprates II](#)
[W12. Metal Insulator Transition II: Theory](#)
[W13. Quantum Monte Carlo](#)
[W14. Quantum Optics](#)
[W15. Quantum Entanglement II](#)
[W16. Focus Session: Novel Biomedical Techniques](#)
[W17. General Biological Physics](#)
[W18. Focus Session: Dynamics of Nucleic Acid-Protein Interactions](#)
[W19. Dopants and Defects in Semiconductors IV](#)
[W20. Oxide Surfaces, Interfaces and Thin Films](#)
[W21. Surfaces and Interfaces II](#)
[W22. Focus Session: Organic Photovoltaics and LEDs](#)
[W23. Focus Session: Manganites II](#)
[W24. Glassy and Amorphous Systems](#)
[W25. Focus Session: Biopolymers: Molecules, Solutions and Networks II](#)
[W26. Focus Session: Advances in Atmospheric Aerosol Science IV](#)
[W27. Focus Session: Spin Glasses and SrCu₂\(BO₃\)₂](#)
[W28. Superlattices and Nanostructures: Electronic Properties II](#)
[W29. Focus Session: Carbon Nanotubes and Related Materials XIV: Theory and Sensing](#)
[W30. Nanotubes and Nanowires III: Other Properties II](#)
[W31. Focus Session: New Materials and Properties of Complex Oxides](#)
[W32. Focus Session: Domain Wall Motion and Itinerant Magnetism](#)
[W33. Focus Session: Spins in Narrow Gap Semiconductors](#)
[W35. Focus Session: Nanotechnology II](#)
[W36. Focus Session: Materials for Photovoltaics and Photocatalysis III](#)
[W37. Focus Session: Multiferrocity in BiFeO₃-based films](#)
[W39. Focus Session: Jamming II: Packing and Force Networks](#)
[W40. Focus Session: Networks, Regulation, and Pathways in Cell Biology](#)

[Session X](#)

[X3. Interface Phenomena in Oxides](#)
[X4. Approaching Quantum Limits in Optomechanical Systems](#)
[X5. Superconducting Sources of THz-Radiation](#)
[X6. Tunnel Magnetoresistance: Yesterday, Today, and Tomorrow](#)
[X7. Understanding Strongly Correlated Materials with Dynamical Mean Field Theory Methods](#)
[X8. Focus Session: Wormlike Micellar Fluids and Vesicles](#)
[X9. Focus Session: Spinor Condensates and Dipolar Gases](#)
[X10. Superconducting Devices and Applications](#)
[X11. Focus Session: MgB₂-like: Properties of Exotic Superconductors](#)
[X12. Charge Density Wave and Charge Order](#)
[X13. Quantum Monte Carlo Methods and Strongly Correlated Systems](#)
[X15. Emerging Nano-based Diagnostics and Therapeutics: Approaches to Cancer Treatment](#)
[X18. Focus Session: Dynamics and Structures in Polymer Melts, Gels and Glasses](#)
[X22. Organic Magnetics and Bio-Electronics](#)
[X23. Focus Session: Multiferroics III: Other](#)
[X24. Nanotubes: Transport, Synthesis and Growth](#)
[X25. Block Copolymer Phase Behavior](#)
[X27. Focus Session: Exchange Bias and Magnetic Interactions](#)
[X28. Focus Session: Optical Properties of Nanostructures VII: Surface Plasmons and Periodic Arrays](#)
[X29. Focus Session: Carbon Nanotubes and Related Materials XV: Electronic Structure and Optical Properties](#)
[X30. Composite and Porous Media](#)
[X31. Focus Session: Ruthenates](#)
[X32. Focus Session: Magnetic Sensors](#)
[X33. Focus Session: Magnetic Resonance in Magnetic Semiconductors](#)
[X35. Semiconducting Devices and Applications](#)
[X36. Advances in Instrumentation and Measurements](#)
[X37. Semiconductors IV: Electronic and Optical Properties II](#)
[X39. Miscellaneous Topics in Statistical Physics](#)
[X40. Self Assembled Protein Cages](#)

[Session Y](#)

[Y3. Novel Physics and Quantum Interference in Weakly Disordered Graphene Devices](#)
[Y4. New Symmetries and Excitations in Multiferroics](#)
[Y5. Charged and Ion-Containing Polymers II](#)
[Y6. Industrial Advanced Characterizations](#)
[Y7. Control of Light with Bacteriorhodopsin](#)
[Y8. Hydrodynamics of Surfaces and Films](#)
[Y9. BEC/Matter Optics/Atom Interferometry](#)
[Y10. Superconducting Nanostructures II](#)
[Y11. Oxide Spectroscopy](#)
[Y12. General Theory](#)
[Y13. Classical Molecular Dynamics and Fluids](#)
[Y15. Focus Session: Quantum Metrology and Control: Fundamental Limits and Applications](#)
[Y18. Dynamics of Thin Polymer Films](#)
[Y22. Interfaces and Adhesion II](#)

[Y23. Focus Session: Electronic Structure of Complex Oxides](#)
[Y24. Nanotube Devices and Applications](#)
[Y25. Theory and Simulations III](#)
[Y27. Focus Session: Kagome Magnets](#)
[Y28. Superlattices and Nanostructures: Electronic Properties III](#)
[Y29. Focus Session: Carbon Nanotubes and Related Materials XVI: Mechanical and Thermal Properties](#)
[Y30. Low Dimensional Systems](#)
[Y31. Focus Session: Sodium Cobaltites](#)
[Y32. Focus Session: Theory and Simulations of Magnetism II](#)
[Y33. Focus Session: Diluted Magnetic Oxides](#)
[Y36. Focus Session: Artificial Neurons](#)
[Y37. Thermodynamic and Transport Properties of Semiconductors](#)
[Y39. Other Topics in Statistical Physics](#)
[Y40. Bionanotechnology](#)
