Small-Angle Neutron Scattering Contrast Variation on Magnetite–Myristic Acid–Benzene Magnetic Fluid <i>A. V. Feoktystov, M. V. Avdeev, V. L. Aksenov, L. A. Bulavin, D. Bica, L. Vekas, V. M. Garamus, and R. Willumeit</i>	1
An Account of Spatial Effects in Describing the Resolution Function of a Neutron Powder Diffractometer with a Planar Monochromator <i>V. I. Bobrovskii</i>	5
Characterization of Radiative Centers in Wide-Band-Gap Materials by Local Cathodoluminescence by the Example of Europium-Doped YAG <i>A. N. Trofimov and M. V. Zamoryanskaya</i>	15
Temperature Dependence of Angular Characteristics of Boron Nitride Sputtering <i>V. E. Yurasova, E. Yu. Zykova, S. S. Elovikov, and M. Yu. Tolpina</i>	21
Comparative Analysis of the Quality of Membrane Protein Bacteriorhodopsin Crystals during Crystallization in Octylglucoside and Octylthioglucoside <i>E. S. Moiseeva, A. B. Reshetnyak, V. I. Borshchevskiy, C. Baeken, G. Buldt, and V. I. Gordeliy</i>	29
Features of the Electron Exchange under Grazing Scattering of H <sup>-</sup> Ions from a Thin Aluminum Disk <i>D. K. Shestakov, I. K. Gainullin, and I. F. Urazgil'din<sup>†</sup></i>	33
Analysis of the X-Ray Absorption Fine Structure near the TiL <sub>2,3</sub> Edge in Free Titanium Nanoclusters <i>A. N. Kravtsova, V. L. Mazalova, G. E. Yalovega, A. V. Soldatov, and R. L. Johnston</i>	38
Implementation of the Light Gathering Power Enhancement of Waveguide Resonators <i>E. V. Egorov and V. K. Egorov</i>	41
Electronic Structure and Optical Properties of Lead Chloride <i>V. V. Sobolev, A. I. Kalugin, I. V. Vostrikov, and V. Val. Sobolev</i>	48
Study of Dislocation EBIC Image Width in GaN Films and GaN Based Structures <i>P. S. Vergeles and E. B. Yakimov</i>	58
Fast Electron Generation under Proton Interaction with a Silicon Surface <i>N. V. Novikov</i>	61
Experimental and Numerical Studies of the Formation of Transient Regions in Nitride Coatings under Bombardment by a Combined Ion Beam <i>N. V. Bukrina, A. G. Knyazeva, and V. P. Sergeev</i>	65
Features of Ion-Beam Etching of Quartz in a Chlorine-Containing Gas Medium <i>V. M. Vetoshkin and P. N. Krylov</i>	75

## Proceedings of Russian Symposium “Space Materials-2007” (Space Materials Science Research Center of the A.V. Shubnikov Institute of Crystallography of RAS, Kaluga)

Problems, Prospects, and Alternatives for Semiconductor Single Crystal Growth in Space <i>B. G. Zakharov, V. I. Strelov, and Yu. A. Osip'yan<sup>†</sup></i>	78
X-ray Topography Characterization of the Structural Response of Ge(Ga) Crystals to Variation in Gravity Force Vector Orientation during Crystallization <i>I. A. Prokhorov, B. G. Zakharov, V. S. Sidorov, and V. I. Strelov</i>	85
Mathematical Model of Biocrystal Growth under a Thermal Control Field <i>V. P. Ginkin, S. M. Ganina, V. I. Strelov, I. Zh. Bezbakh, and B. G. Zakharov</i>	90

Effect of Gravitation Vector Orientation Relative to the Solidification Front on the Micro- and Macrohomogeneity of Semiconductor Crystals Grown under Terrestrial and Space Conditions <i>V. I. Strellov, B. G. Zakharov, and V. K. Artemiev</i>	98
Cluster Hydrodynamic Model of the Heat and Mass Transfer in Crystal Growth and Its Significance for Space Materials Science <i>V. P. Ginkin and A. V. Kartavykh</i>	105
Effect of High-Frequency Vibrations on Oriented Crystallization of Binary Alloys <i>D. V. Lyubimov, T. P. Lyubimova, Ya. N. Parshakova, B. Roux, Chung-Wen Lan, and Wan-Chin Yu</i>	116
Melt Structural Self-Organization in the Transition Layer during Crystal Growth under Microgravity Conditions <i>A. V. Kartavykh and V. P. Ginkin</i>	121
Possibilities for Achieving Steady-State Growth Conditions during Oriented Crystallization of Gallium Antimonide by the Vertical Bridgman Method Using the “Polizon” Setup <i>Yu. A. Serebryakov, M. P. Marchenko, I. A. Prokhorov, E. N. Korobeinikova, and I. L. Shulpina</i>	129
Optimization of Boundary Conditions for a Distributed Control System on the Growing of Crystals <i>A. A. Belov, V. Yu. Zakharov, and V. I. Strellov</i>	137
Measurement of Inertial Microaccelerations with the Use of Convection Sensors <i>I. A. Babushkin, A. F. Glukhov, V. A. Demin, E. A. Zilberman, and G. F. Putin</i>	142
Vibrational Convection of a Binary Mixture in Connected Channels <i>I. A. Babushkin, A. F. Glukhov, and V. A. Demin</i>	148
Methods for Improving the Microgravity Environment onboard Automatic Spacecrafts for Microgravity Investigations <i>A. A. Lobykin</i>	154
<hr/>	
Magnetic Fluids with Excesses of a Surfactant According to the Data of Small-Angle Neutron Scattering <i>V. I. Petrenko, M. V. Avdeev, V. L. Aksenov, L. A. Bulavin, and L. Rosta</i>	161
Processing and Identification of Field-Emission Images of Metallic Surfaces <i>N. V. Egorov, A. G. Karpov, and Che-Chou Shen</i>	165
<hr/> <hr/>
