Vol. 3, No. 3, 2009

Simultaneous English language translation of the journal is available from Pleiades Publishing, Ltd.

Distributed worldwide by Springer. *Journal of Surface Investigation. X-ray, Synchrotron and Neutron Techniques* ISSN 1027-4510.

Investigation of TiC–C Coatings by X-Ray Photoelectron Spectroscopy <i>M. V. Kuznetsov, S. V. Borisov, O. P. Shepatkovskii, Yu. G. Veksler, and V. L. Kozhevnikov</i>	331
Fractal Structure of Gold Clusters Formed under Vacuum Deposition on Dielectric Substrates <i>A. V. Belko, A. V. Nikitin, N. D. Strelak', and A. E. German</i>	338
EXAFS and XMCD Studies of Correlations of Atoms and Magnetic Moments in the Disordered Nanocrystalline Alloys Fe with <i>sp</i> -Elements (Al, Si, Sn) <i>E. V. Voronina, T. Miyanaga, Sh. Nagamatsu, T. Fujikawa, and L. V. Dobysheva</i>	343
Determination of Atomic Pair Correlation Functions for Nickel Oxide Films via Extended Energy-Loss Fine Structure Spectroscopy <i>O. R. Bakieva, D. E. Gai, A. N. Deev, and F. Z. Gil'mutdinov</i>	351
Semianalytical Theory of Focusing Synchrotron Radiation by an Arbitrary System of Parabolic Refracting Lenses and the Problem of Nano-Focusing <i>V. G. Kohn</i>	358
Electronic Structure of Strontium Titanate <i>V. V. Sobolev, V. Val. Sobolev, and D. M. Urakov</i>	365
Space–Time Analysis of the Mössbauer Radiation Scattering <i>F. S. Dzheparov, D. V. Lvov, and E. V. Silvacheva</i>	372
Synthesis and Structural Investigation of Ferrofluids with Porphyrins and Prospects of Their Application in Photodynamic Therapy <i>Yu. V. Kulvelis, V. A. Trounov, V. T. Lebedev, D. N. Orlova, and M. L. Gelfond</i>	379
Description of Integral Intensity of Bragg Peaks in Neutron Powder Diffractometers with Regard to the Spatial Effects <i>V. I. Bobrovskii</i>	387
Small Copper Clusters: Study of the Local Atomic and Electronic Structure by the XANES and DFT Methods <i>V. L. Mazalova, G. E. Yalovega, and A. V. Soldatov</i>	394
Analysis of Time-Resolved XANES Spectra for Determining the Organometallic Compound Structure in Solution <i>G. Yu. Smolentsev and A. V. Soldatov</i>	398
A Nonlinear Thermal Spike Model for Pyrolytic Graphite under Irradiation with ⁸⁶ Kr and ²⁰⁹ Bi High-Energy Heavy Ions <i>I. V. Amirkhanov, A. Yu. Didyk, D. Z. Muzafarov, I. V. Puzynin, T. P. Puzynina, N. R. Sarkar, I. Sarkhadov, and Z. A. Sharipov</i>	402
Investigation of 4H-SiC Epitaxial Layers Implanted by Al Ions <i>E. V. Kolesnikova, E. V. Kalinina, A. A. Sitnikova, , and M. V. Zamoryanskaya</i>	411
Features of the Variation in Reflection Spectra of the F4MB/Al Coating under Bombardment by H ⁺ , H ₂ ⁺ , and H ₃ ⁺ Ions <i>M. M. Mikhailov and V. V. Frizen</i>	415
Adsorption States of Protium and Deuterium in Redeposited Polymer Hydrocarbon Films from a T-10 Tokamak <i>N. Yu. Svechnikov, V. G. Stankevich, L. P. Sukhanov, K. A. Men'shikov, A. M. Lebedev, B. N. Kolbasov, Ya. V. Zubavichus, and D. Rajarathnam</i>	420
Principles of Generalized Spin-Echo Spectroscopy <i>V. T. Lebedev</i>	429

On Distortions of the Shape of Bragg Peaks in a Neutron Powder Diffractometer <i>V. I. Bobrovskii</i>	437
Features of X-Ray Diffraction on Sapphire Single Crystals with a Nanostructured Surface <i>A. E. Blagov, P. A. Prosekov, Ju. V. Grischenko, M. L. Zhanaveskin, B. S. Roschin, A. V. Butashin, V. A. Feodorov, V. M. Kanevskii, and V. E. Asadchikov</i>	447
Investigation of Molecular Complexes of Blood Serum by Laser Correlation Spectroscopy and Atomic-Force Microscopy <i>M. V. Spiridonov, V. G. Pevgov, A. S. Baturin, and G. K. Grigor'ev</i>	450
Analysis of the Ni K-Edge X-Ray Absorption Near Edge Structure in Ni((C ₂ H ₅ O) ₂ PS ₂) ₂ <i>G. B. Sukharina, A. V. Soldatov, A. N. Kravtsova, L. N. Mazalov, S. V. Trubina, S. B. Erenburg, N. V. Bausk, and N. A. Kryuchkova</i>	457
Analysis of the Local Atomic Structure of Aluminum Nitride Nanoparticles <i>A. A. Guda, V. L. Mazalova, G. E. Yalovega, and A. V. Soldatov</i>	460
Methods of Electron Microdiffraction and X-Ray Analysis in Structure Study of Nanodisperse Partially Stabilized ZrO ₂ Powders <i>N. A. Zaporina, O. A. Doynikova, A. P. Krumina, D. A. Bocharov, and J. P. Grabis</i>	464
Use of the Projective Method for Determining Statistical Characteristics of the Solution to the Differential Diffusion Equation of Minority Carriers Generated in a Semiconductor Material by a Wide Electron Beam <i>E. V. Seregina, A. M. Makarenkov, and M. A. Stepovich</i>	468
Width of Electron-Transparency Windows at Structural Geometric Resonance in a Planar Nanostructure <i>G. V. Wolf and Yu. P. Chuburin</i>	483
Effect of a Temperature Gradient on the Polarization Distribution in the Surface Layer of TGS Crystals <i>O. V. Malyshkina</i>	488
