---

X-ray Computer Tomography of Natural Fibrous Diamonds and Ballas <i>D. A. Zolotov, A. V. Buzmakov, A. A. Shiryayev, and V. E. Asadchikov</i>	659
Multiple Small-Angle Neutron Scattering in Media with a High Concentration of Inhomogeneities <i>F. S. Dzheparov, K. S. Zabelin, and D. V. Lvov</i>	665
Dynamics of Bulk Destruction of Transparent Dielectric Polymeric Materials under a Pulsed High-Energy Electron Beam <i>B. A. Demidov, V. P. Efremov, V. A. Petrov, and A. N. Mescheryakov</i>	673
Wave Packet Splitting and Zitterbewegung in Two-Dimensional Semiconductor Structures with Spin–Orbit Coupling <i>V. Ya. Demikhovskii, G. M. Maksimova, and E. V. Frolova</i>	678
Fabrication of PDLC Films Based on Acrylic Monomers and Study of the Electric Field Effect on the Alignment Structure of Liquid Crystal Droplets in PDLC Films <i>S. V. Siprova, A. I. Mashin, G. Chidichimo, G. De Filipo, A. V. Korobkov, and A. V. Nezhdanov</i>	686
Development of Copper Meshes for Frequency and Spatial Selection of the Terahertz Radiation of the Novosibirsk Free Electron Laser <i>S. A. Kuznetsov, B. G. Gol'denberg, P. V. Kalinin, V. S. Eliseev, and E. V. Petrova</i>	691
Luminescence and Structure of Nanosized Inclusions Formed in SiO <sub>2</sub> Layers under Double Implantation of Silicon and Carbon Ions <i>D. I. Tetel'baum, A. N. Mikhailov, A. I. Belov, V. K. Vasil'ev, A. I. Kovalev, D. L. Vainshtein, Y. Golan, and A. Oshero</i>	702
Photoelectric Properties of the GeSi/Si Heterostructures with Self-Assembled Nanoclusters Grown by Sublimation Molecular Beam Epitaxy in a GeH <sub>4</sub> Medium <i>D. O. Filatov, M. V. Kruglova, M. A. Isakov, A. P. Gorshkov, V. G. Shengurov, V. Yu. Chalkov, S. A. Denisov</i>	709
Comparative Analysis of Morphology and Optical Properties of GaN Layers on Sapphire <i>E. A. Vopilkin, V. I. Shashkin, O. I. Khrykin, Yu. N. Drozdov, S. A. Gusev, N. V. Vostokov, and A. Yu. Luk'yanov</i>	718
Combined STM/AFM Visualization of the Local Density of States in the InAs/GaAs Quantum Dots <i>P. A. Borodin, A. A. Bukharaev, D. O. Filatov, D. A. Vorontsov, and M. A. Lapshina</i>	721
Atomic Force Microscopy of Cobalt Nanoparticles with Electro-Catalytic Properties <i>S. A. Ziganshina, A. A. Bukharaev, L. I. Shamsetdinova, A. P. Chuklanov, D. A. Bizyaev</i>	725
The Influence of a Probe on Topographical Images in Atomic Force Microscopy <i>N. G. Tsirkunova, V. E. Borisenko, L. V. Kukhareenko, M. V. Gol'tsev, and S. A. Chizhik</i>	730
Formation, Electronic Structure, and Stability of Film Nanophases of Transition Metals on Silicon <i>N. I. Plyusnin, V. M. Il'yashchenko, S. A. Kitan', and S. V. Krylov</i>	734
Dislocation Generation in Heat-Treated Nitrogen-Doped Silicon Wafers when Applying External Loads <i>M. V. Mezhenyi, M. G. Mil'vidskii, and V. Ya. Reznik</i>	747
Spatial Structures Formed during High-Temperature Vacuum Annealing of Diamond-Like Film Deposited on a Silicon Substrate <i>M. B. Tsetlin, A. A. Zakharov, K. I. Maslakov, M. N. Mikheeva, and I. Lindau</i>	752
A Study of the Microstructure of La <sub>1-x</sub> Ca <sub>x</sub> MnO <sub>3</sub> (x = 0.5, 0.8) Solid Solutions <i>E. Yu. Gerasimov, V. I. Zaikovskii, S. V. Tsybulya, and L. A. Isupova</i>	756

Analysis of Structural Features of Tin Dioxide-Based Fractal Nanocomposites by Atomic-Force Microscopy and X-Ray Diffraction	
<i>I. E. Grachova, A. I. Maksimov, and V. A. Moshnikov</i>	761
AFM Study of the Microwave Effect on Hydrogen-Containing Ferroelectric Triglycine Sulfate	
<i>G. I. Ovchinnikova, A. N. Soloshenko, N. V. Belugina, R. V. Gainutdinov, and A. L. Tolstikhina</i>	769
Scanning-Probe-Induced Local Decomposition of Solid Germanium Monoxide Films: The Nano-Patterning of Germanium	
<i>K. N. Astankova, D. V. Sheglov, E. B. Gorokhov, V. A. Volodin, A. G. Cherkov, A. V. Latyshev, and M. Vergnat</i>	773
Determination of Limiting Parameters of Multiple-Beam Electron-Optical Systems for Diagnostics of Semiconductor Structures	
<i>V. V. Kaz'miruk and T. N. Savitskaya</i>	781
Formation of an Encapsulated Fe <sub>2</sub> O <sub>3</sub> Nanostructure during Mechanochemical Interaction of Iron Oxide and Excess Alumina	
<i>V. B. Potapkin, A. V. Zabolotskii, A. A. Novakova</i>	786
Synthesis of Nanostructured SiC Films During Pulsed Photon Treatment of Si in a Carbon-Containing Atmosphere	
<i>V. M. Ievlev, V. S. Ilyin, S. B. Kushev, S. A. Soldatenko, A. N. Lukin, E. K. Belonogov</i>	791
Computer Simulation of the Theoretical Contrast of Various Types of Structure Defects with Noise Factors	
<i>V. A. Tkal', I. V. Dzyuba, and L. N. Danil'chuk</i>	797
Atomic Force Microscopy in Studying Regeneration of Tissues in Sclera Plasty in Ophthalmology	
<i>V. V. Zharov, A. N. Lyalin, O. V. Karban', P. A. Perevozchikov, N. N. Samartseva, G. N. Konygin, and S. S. Leesment</i>	804
On the Possibilities of Implementing a Stochastic Model for the Distribution of Nonequilibrium Minority Charge Carriers in a Semiconductor Material	
<i>E. V. Seregina, A. M. Makarenkov, and M. A. Stepovich</i>	809
On Applicability of Confluence Analysis in Cathodoluminescence Microscopy for Interval Estimation of Diffusion Lengths of Minority Carriers and Depths of Subsurface Regions with Depletion of Majority Carriers	
<i>N. N. Mikheev, A. N. Polyakov, and M. A. Stepovich</i>	820
Determination of the Coefficient of Electron Transmission Using Temperature Measurements	
<i>A. Yu. Antonov, N. V. Egorov, and L. C. Chao</i>	826
Surface Reconstruction of a Field Electron Emitter	
<i>K. A. Nikiforov, N. V. Egorov, and Che-Chou Shen</i>	833
Optimization of a Data Storage System Based on the Array of Ferromagnetic Particles and Magnetic Force Microscope	
<i>V. L. Mironov and O. L. Ermolaeva</i>	840
