Vol. 4, No. 2, 2010

A simultaneous English language translation of this journal is available from Pleiades Publishing, Ltd.
Distributed worldwide by Springer. *Journal of Surface Investigation. X-ray, Synchrotron and Neutron Techniques* ISSN 1027-4510.

Femtosecond Laser Plasma in CaF ₂ Crystal Microchannel and Effective Generation of Characteristic X-ray Radiation <i>V. M. Gordienko, I. A. Makarov, V. P. Petukhov, and A. S. Khomenko</i>	183
Low-Energy Electron Transmission through Dielectric Capillaries <i>V. P. Petukhov</i>	189
Bremsstrahlung Spectrum of Nonrelativistic Electrons Scattered in Metallic Target: Theory and Experiment <i>V. A. Astapenko, A. S. Baturin, and E. V. Korostylev</i>	193
X-Ray Source Based on a Compact Electron Linear Accelerator with a Thin Anode <i>E. A. Sozontov, V. V. Safronov, and G. Gutman[†]</i>	199
Proposal of an Experiment for Discovery and Study of Diffracted Radiation of Channeled Electrons <i>D. A. Baklanov, I. E. Vnukov, V. K. Grishin, A. N. Ermakov, Yu. V. Zhandarmov, and R. A. Shatokhin</i>	203
Electron Emission Features of the Derivatives of Radiation Carbonization of Poly(vinylidene fluoride) <i>L. A. Pesin, S. S. Chebotaryov, A. M. Kuvshinov, I. I. Bespal', I. V. Gribov, N. A. Moskvina, V. L. Kuznetsov, S. E. Evsyukov, A. V. Vyazovtsev, and N. S. Kravets</i>	214
Simulation of Desorption of Gold Nanoclusters Deposited on the (111) Surface of Al and Au under Bombardment with Au ₁ Ions and Au ₄₀₀ Clusters Using the Classical Molecular Dynamics Method <i>E. E. Zhurkin</i>	221
Phase Transformations under Indenter in Silicon Bombarded by Low-Intensity Flux of Beta Particles <i>A. A. Dmitrievskii, N. Yu. Efremova, Yu. I. Golovin, and A. V. Shuklinov</i>	229
Ion-Beam Reduction of the Surface of Higher Niobium Oxide <i>N. V. Alov and D. M. Kutsko</i>	232
Dynamics of Hydrogen Accumulation and Radiation-Stimulated Release from Steels <i>N. N. Nikitenkov, A. M. Khashkhash, Yu. I. Tyurin, I. P. Chernov, and A. M. Lider</i>	236
Residual Stress in Diamond-Like Carbon Films: Role of Growth Conditions and Ion Irradiation <i>O. A. Podsvirov, P. A. Karaseov, A. Ya. Vinogradov, A. Yu. Azarov, N. N. Karasev, A. S. Smirnov, A. I. Titov, and K. V. Karabeshkin</i>	241
Features of High-Power Ion Beam Irradiation of Nanoporous Si and SiO ₂ <i>V. S. Kovivchak, R. B. Burlakov, and N. A. Davletkil'deev</i>	245
Energy Loss of Light Ions in Different Carbon Compounds <i>Yu. A. Belkova and Ya. A. Teplova</i>	248
Simulation of Fast Electron Transport in Silicon <i>N. V. Novikov</i>	251
Hydrogen Permeability of Protective Coating Formed by Electron Treatment of Zirconium Alloys <i>I. P. Chernov, Yu. P. Cherdantsev, A. M. Lider, Yu. I. Tyurin, N. S. Pushilina, and S. V. Ivanova</i>	255
Dissociation of Fast Molecular Ions under Interaction with a Material: Separation of Atomic Fragments <i>L. L. Balashova</i>	262

Calculation of the Electrode Surface Temperature in the Cathode Spot of Normal Glow Discharge at Atmospheric Pressure	266
<i>V. I. Kristya</i>	
Estimation of the Density Particle Fluxes in the Weakly Dissipative Kolmogorov–Arnol’d–Mozer theory	269
<i>R. I. Bogdanov and M. P. Bogdanov</i>	
Cross Section for Single-Electron Capture by Fast He ⁺ Ions	276
<i>N. V. Novikov</i>	
Relativistic Electron Radiation Spectra at Axial Channeling in Crystals	282
<i>A. A. Anan’eva, O. V. Bogdanov, and Yu. L. Pivovarov</i>	
Most Probable and Average Energy Losses of the Beam of Monoenergetic Charge Particles with Average and Low Energies at Multiple Scattering	289
<i>N. N. Mikheev</i>	
Estimation of Crystal Sample Structure by Means of Fast Electron Radiation	295
<i>D. A. Baklanov, I. E. Vnukov, Yu. V. Zhandarmov, and R. A. Shatokhin</i>	
On the Ratio of the Relativistic Electron PXR in the Bragg Direction and in the Forward Direction in Laue Geometry	303
<i>S. V. Blazhevich and A. V. Noskov</i>	
Contributions of Transition and Parametric X-Ray Radiation along the Relativistic Electron Velocity in the Laue Geometry	315
<i>S. V. Blazhevich and A. V. Noskov</i>	
X-Ray Microanalysis of Polyvinyltrimethylsilane Surface after Impact of Accelerated Oxygen Plasma Flow	322
<i>V. N. Chernik, A. I. Akishin, A. A. Paskhalov, A. S. Patrakeev, G. G. Bondarenko, and A. I. Gaidar</i>	
Effect of Coimplantation of Iron and Chromium Ions on the Optical Properties of Aluminum Oxide	327
<i>A. V. Kabyshev and F. V. Konusov</i>	
The Effect of Atomic Dynamics on the Energy Loss of Ions Channeled in Carbon Nanotubes	335
<i>I. V. Lysova, A. S. Sabirov, and A. V. Stepanov</i>	
Phase Formation and Structural Changes in the Chromium–Silicon System Exposed to Compressed Plasma Fluxes	338
<i>V. V. Uglov, N. T. Kvasov, Yu. A. Petukhov, V. M. Astashinskii, and A. M. Kuz’minskii</i>	
Formation of Nickel Coatings by Electrochemical Deposition under X-ray Irradiation	343
<i>V. M. Anishchik, N. G. Val’ko, N. I. Moroz, A. S. Vorontsov, and V. V. Vojna</i>	
Model of the Effect of the Transverse Cooling and Heating of Channeled Electrons with the Inclusion of the Distribution of Ions over Charges	347
<i>G. P. Pokhil and V. V. Cherdyntsev</i>	
Comparative Analysis of Long-Range Effect Using RBS Technique and Microhardness Measurements	350
<i>V. L. Levshunova, G. P. Pokhil, D. I. Tetel’baum, and P. N. Chernykh</i>	
Role of Polycrystalline Titanium Grain Size in the Formation of the Concentration Profiles of Implanted Aluminum Ions	353
<i>T. V. Vakhnii, G. A. Vershinin, Yu. P. Sharkeev, I. A. Kurzina, A. Yu. Eroshenko, T. S. Grekova, and B. P. Gritsenko</i>
