Vol. 4, No. 5, 2010

A simultaneous English language translation of this journal is available from Pleiades Publishing, Ltd.
Distributed worldwide by Springer. *Journal of Surface Investigation. X-ray, Synchrotron and Neutron Techniques* ISSN 1027-4510.

Features of the Formation of a Perovskite Phase in Thin Polycrystalline Pb(Zr,Ti)O ₃ Films <i>V. P. Pronin, S. V. Senkevich, E. Yu. Kaptelov, and I. P. Pronin</i>	703
Comparison of Extended-Defect Contrasts Calculated in the XBIC and EBIC Methods <i>E. B. Yakimov</i>	709
AFM Investigation of Films Based on UV-Solidified Powder Oligoesterdimethacrylate Compositions <i>Yu. V. Kotova, T. E. Sukhanova, M. E. Vylegzhanina, A. I. Grigoriev, L. M. Egorova, N. A. Egorova, N. G. Kuzina, and L. N. Mashlyakovsky</i>	712
Fabrication of Specified-Geometry Metal Pattern by Proton Irradiation through a Single-Layer Mask <i>B. A. Gurovich, A. G. Domantovskii, and K. I. Maslakov</i>	722
Evolution of the Phase-Structure State during Annealing of Fe–ZrN Films Grown by Magnetron Sputtering <i>O. M. Zhigalina, D. N. Khmelenin, E. N. Sheftel, G. Sh. Usmanova, and M. Inoue</i>	727
Development of the Method of Electron–Optical in Situ Monitoring for Periodic Structures <i>M. Yu. Barabanenkov, V. V. Kazmiruk, and T. N. Savitskaya</i>	733
Periodic Domain Structures Obtained by Growth of LiNbO ₃ Crystals Doped with Gadolinium <i>L. S. Kokhanchik, M. N. Palatnikov, and O. B. Scherbina</i>	740
Electron Microscopy Investigation of AlMg6 Aluminum Alloy Surface Defects Caused by Microorganisms Extracted in Space Stations <i>T. A. Alekhova, V. Ya. Shklover, N. A. Zagustina, N. V. Shvyndina, A. D. Plotnikov, and A. L. Vasil'ev</i>	747
Investigations of Electron Beam Induced Conductivity in Silicon Oxide Thin Films <i>S. S. Borisov, P. S. Vergeles, and E. B. Yakimov</i>	754
Comparative Study of Cathode and Magnetron Sputtering Methods for Depositing Pb(TiZr)O ₃ Ferroelectric Film <i>V. G. Beshenkov, A. G. Znamenskii, and V. A. Marchenko</i>	758
Study of Elemental and Phase Composition of PZT Thin Films by Auger Depth Profiling <i>V. G. Beshenkov, V. A. Marchenko, and A. G. Znamenskii</i>	761
Study of Irradiated Superconducting Films by SPM Techniques <i>S. V. Antonenko, S. M. Tolkacheva, and V. A. Frolova</i>	766
Oriented Surface Self-Segregation in Lead Titanate Single Crystals <i>Yu. Ya. Tomashpolskii and N. V. Sadovskaya</i>	769
On the Technique of Absolutization of Diffuse Scattering Intensity Measurements Based on Thermal Diffuse Scattering Measurements <i>V. T. Bublik, K. D. Shcherbachev, M. I. Voronova, and E. V. Zhevnerov</i>	773
On One Possibility of the Mathematical Modeling of the Dependence of Cathodoluminescence Intensity on the Energy of Beam Electrons with the Use of the Power Series Approximation in the Problem of Identifying the Parameters of Semiconductor Materials <i>T. I. Kovtunova, N. N. Mikheev, A. N. Polyakov, and M. A. Stepovich</i>	778
SIMS Diagnostics of the Structure of Nanometer-Sized Semiconducting Layers Doped with Impurities <i>A. N. Pustovit</i>	784

Peculiarities of Electron Exchange between a Negative Hydrogen Ion and Atomic Chains	
<i>T. N. Polivnikova, K. K. Satarin, A. A. Khaidarov, and I. K. Gainullin</i>	788
Scanning Helium Ion Microscope: Distribution of Secondary Electrons and Ion Channeling	
<i>Yu. V. Petrov, O. F. Vyvenko, and A. S. Bondarenko</i>	792
Investigation into the Formation of X-Ray Photopolymer Lenses	
<i>T. A. Sagdullin, L. G. Shabel'nikov, and D. V. Irzhak</i>	796
Formation of Nanostructures on the Surface of Polymer Films by an Atomic Force Microscope Tip	
<i>A. N. Stepanov and D. A. Yashunin</i>	803
Use of Cluster Secondary Ions for Minimization of Matrix Effects in the SIMS Depth Profiling of La/B ₄ C Multilayer Nanostructures	
<i>M. N. Drozdov, Yu. N. Drozdov, M. M. Barysheva, V. N. Polkovnikov, and N. I. Chkhalo</i>	807
Oriented Surface Autosegregation in the Lead Germanate Single Crystals	
<i>Yu. Ya. Tomashpolsky and N. V. Sadovskaya</i>	811
The Effect of Heating on Optical Properties and Radiation Resistance of Coatings Based on Micro- and Nanosized Aluminum Oxide Powders	
<i>M. M. Mikhailov, T. A. Burtseva, and A. N. Lapin</i>	817
Diffraction Channeling Radiation for Axial Electron Channeling	
<i>K. B. Korotchenko, Yu. L. Pivovarov, T. A. Tukhfatullin, and E. I. Fiks</i>	823
Kinetics of the Formation of Gas Bubbles during Polarization of Copper and Graphite Electrodes in Electrolytic Aqueous Solutions	
<i>A. M. Orlov, I. O. Yavtushenko, and M. V. Churilov</i>	831
Thin Film Semiconductor Islands and Numerical Experiment	
<i>G. I. Zmievskaia and A. L. Bondareva</i>	836
Radiation Damage of Material Surfaces under Prolonged Irradiation with He ⁺ and Ar ⁺ Ions with Broad Energy Spectra	
<i>B. A. Kalin, N. V. Volkov, S. E. Sabo, and S. V. Zaitsev</i>	845
Ion-Implanted Deuterium Accumulation in a Deposited Tungsten Coating	
<i>V. V. Bobkov, A. V. Onishchenko, O. V. Sobol', R. I. Starovoitov, Yu. I. Kovtunenkov, Yu. E. Logachev, and L. P. Tishchenko</i>	852
The Schottky Barrier at Homogeneous Impurity Distribution in a Semiconductor	
<i>V. B. Bondarenko, A. V. Filimonov, and E. Yu. Koroleva</i>	859
Interfacial Polarization in Statistical Mixtures	
<i>V. A. Sotskov</i>	862
Partial Local Connectivity on Different Surfaces	
<i>N. L. Smirnova</i>	866
