Features in Phase-Contrast Images of Micropipes in SiC in White Synchrotron Radiation Beam <i>V. G. Kohn, T. S. Argunova, and Jung Ho Je</i>	1
X-Ray Scattering and Volumetric $P-V-T$ Studies of the Dimyristoylphosphatidylcholine–Water System <i>D. V. Solov'ev, A. I. Kuklin, P. K. Utrobin, A. N. Ozerin, T. S. Kurkin, O. I. Ivan'kov, L. A. Bulavin, and V. I. Gordelii</i>	7
Study of the Electronic Structure of Al(III) and Zn(II) Complexes with Organic Ligands by Quantum Chemistry and Photoelectron Spectroscopy Methods <i>K. G. Vladimirova, A. A. Vashchenko, O. V. Kotova, L. S. Lepnev, A. A. Bagatur'yants, A. G. Vitukhnovsky, V. G. Nazin, L. L. Lev, and V. A. Rogalev</i>	11
Initial Stage of Oxidation of Titanium <i>V. G. Nazin, M. N. Mikheeva, L. L. Lev, and V. A. Rogalev</i>	17
Spreading of an SR Beam Spot (Diameter 0.5 $\mu\text{m}$ , 95 eV) Photoelectron Image on the Surface of $\text{WO}_{3-x}$ Films <i>N. Yu. Svechnikov</i>	21
Determination of the Reduction Depth of Tungsten Oxide Thin Films under the Effect of Proton Irradiation <i>B. A. Gurovich, K. E. Prikhod'ko, L. V. Kutuzov, E. A. Rotanov, and A. P. Bandura</i>	30
Interaction of Biological and Nonbiological Surfaces. New Opportunities for Research and Technologies Using Synchrotron Radiation <i>S. M. Bezruchko<sup>†</sup>, S. M. Kuzmin, O. V. Sergeev, and N. V. Spinko</i>	34
Spectroscopic Investigations of Wide-Band Fluoride Crystals Doped with Ions of Some Rare-Earth Elements under X-Ray Excitation <i>V. A. Bezhanov, E. I. Zinin, D. N. Karimov, V. V. Mikhailin, and S. P. Chernov</i>	43
X-Ray Photoelectron Investigation of Charge Distribution in Copper(II) Phthalocyanine Complexes <i>R. V. Gulyaev, N. A. Kryuchkova, L. N. Mazalov, A. I. Boronin, T. V. Basova, and V. A. Plyashkevich</i>	48
Diagnostics of Height Distribution of InAs/GaAs Quantum Dot Arrays by Means of Carbon Tetrachloride Treatment in Vapor Phase Epitaxy Conditions <i>A. V. Zdoroveishev, P. B. Demina, and I. A. Karpovich</i>	57
Mathematical Modeling of the Evolution of Polaron States <i>I. V. Amirkhanov, E. V. Zemlyanaya, V. D. Lakhno, D. Z. Muzapharov, I. V. Puzynin, T. P. Puzynina, and Z. A. Sharipov</i>	60
Formation of Oriented Rodlike Nickel Silicide Precipitates during Magnetron Deposition of Carbon and Nickel on Silicon <i>P. N. Chernykh, N. G. Chechenin, I. A. Sergachev, and M. A. Timofeev</i>	65
Analysis of Depth Profiles of Hydrogen Isotopes in Structural Materials via Reflected Electron Spectroscopy <i>V. P. Afanas'ev, M. V. Afanas'ev, A. A. Batrakov, W. Bohmeyer, D. Naujoks, A. V. Lubenchenko, and A. Markin</i>	70
The Effect of Different Treatments on Fractal Forms of Gallium Arsenide Surface <i>V. G. Bozhkov, N. A. Torkhov, V. A. Novikov, N. V. Zemskova, and V. A. Burmistrova</i>	75
Calculation of the Temperature-Dependent Energy Characteristics of Adsorption Systems Based on Transition Metals <i>A. V. Matveev</i>	90

Correlation between the Energy of the Ion Scattered from the Metal Surface and Its Melting Heat <i>V. V. Evstifeev and N. V. Kostina</i>	96
Mechanochemical Effects in Titanium Nickelide–Stainless Steel Bilayer Samples <i>L. I. Kveglis, R. B. Abylkalykova, E. M. Seilhanov, G. B. Tajibaeva, and V. V. Kazantseva</i>	101
A Neutron Reflectometer on Thermal Neutrons with Variable Wavelength <i>A. B. Rubtsov, N. F. Miron, V. A. Somenkov, V. I. Bodnarchuk, and S. P. Yaradaikin</i>	105
Magnetic Ordering in Mn <sub>3</sub> Sb Determined by Neutron Diffraction Data <i>V. M. Ryzhkovskii, V. S. Goncharov, S. S. Agafonov, V. P. Glazkov, V. A. Somenkov, A. P. Sazonov, and A. T. Senishin</i>	109
Structure of Complexes of Sulphuretted Tetraphenylporphine with Poly-N-vinylpyrrolidone According to the Data of Small-Angle Neutron Scattering <i>Yu. V. Kul'velis, V. T. Lebedev, V. A. Trunov, I. N. Ivanova, and D. Török</i>	113
Effects of Spatial Ordering of Quantum Dot Arrays from Small-Angle X-Ray Diffraction Data under Variation of Growth Parameters <i>L. M. Plyasova, I. Yu. Molina, N. P. Stepina, A. F. Zinov'eva, and A. V. Dvurechenskii</i>	120
Study of CdSe/CdS Quantum Dots in Solutions and Gels by Small-Angle X-Ray Scattering <i>N. B. Simonova, F. V. Tuzikov, R. N. Khramov, N. A. Tuzikova, M. F. Tuzikov, and M. S. Vakshstein</i>	126
Ab Initio Simulation of Resonant Forbidden Reflections in Ge Crystals <i>A. P. Oreshko, V. E. Dmitrienko, and E. N. Ovchinnikova</i>	134
Synchrotron Radiation Interference in Front of the Silicon Absorption Edge for Silicon-on-Insulator Structures <i>E. P. Domashevskaya, V. A. Terekhov, and S. Yu. Turishchev</i>	141
Influence of X-Rays on Optical Properties of Lithium Tantalite Crystals <i>T. R. Volk and P. V. Ionov</i>	150
X-Ray Interferometric Investigation of Deformation Fields in Ion-Implanted Silicon Crystals <i>H. R. Drmeyan, A. H. Aboyan, and F. H. Eyrarnjyan</i>	155
Features of the Manufacture of Deep X-Ray Lithography Masks in the Siberian Synchrotron and Terahertz Radiation Center <i>B. G. Gol'denberg, A. Yu. Abramskii, A. G. Zelinskii, A. I. Maslii, E. A. Maksimovskii, V. I. Kondrat'ev, V. P. Korol'kov, K. E. Kuper, E. V. Petrova, and V. F. Pindyurin</i>	159
Structure and Phase Composition Studies of Partially Stabilized Zirconia <i>M. A. Borik, V. T. Bublik, M. A. Vishnyakova, E. E. Lomonova, V. A. Myzina, N. Yu. Tabachkova, and A. A. Timofeev</i>	166
Ion-Beam Sputtering of Quartz Samples: Material Properties Observed in the Mass Spectra of Secondary Ions <i>P. I. Didenko and A. A. Efremov</i>	172
Mobility Restriction of Charge Carriers in Bismuth Films Due to Film Block Structure <i>V. M. Grabov, E. V. Demidov, and V. A. Komarov</i>	177
Comparison of the Dynamics of Grid Structures under Thermal and Radiation Actions on Amorphous Co–Ni–P Alloys <i>S. V. Dolzhikov, V. S. Plotnikov, B. N. Grudin, and O. V. Voitenko</i>	182
Morphological, Mechanical, Corrosion and Hydrogen Permeation Characteristics of Ni–nano-TiO <sub>2</sub> Composite Coating Compared to Ni Electrodeposited on Low Carbon Steel <i>Amir Sadeghi, Dr. R. Khosroshahi, and Z. Sadeghian</i>	186
Floquet–Bloch Waves in Bound One-Dimensional Photonic Crystals <i>J. Kh. Nurligareev</i>	193
