Vol. 7, No. 1, 2013

A simultaneous English language translation of this journal is available from Pleiades Publishing, Ltd.

Distributed worldwide by Springer. *Journal of Surface Investigation. X-ray, Synchrotron and Neutron Techniques* ISSN 1027-4510.

Experimental Investigation of C ₆₀ /NMP/Toluene Solutions by UV–Vis Spectroscopy and Small-Angle Neutron Scattering <i>T. V. Tropin, T. O. Kyrey, O. A. Kyzyma, A. V. Feoktistov, M. V. Avdeev, L. A. Bulavin, L. Rosta, and V. L. Aksenov</i>	1
Powder Structure of Magnetic Nanoparticles with a Substituted Pyrrole Copolymer Shells According to Small-Angle Neutron Scattering <i>V. I. Petrenko, M. V. Avdeev, R. Turcu, A. Nan, L. Vekas, V. L. Aksenov, L. Rosta, and L. A. Bulavin</i>	5
Determination of the Characteristics of a Double Monochromator in Neutron Powder Diffractometers with Allowance for Spatial Effects <i>V. I. Bobrovskii</i>	10
Deuterium Accumulation in an Assembly of Nickel Foils Irradiated by High-Temperature Deuterium Plasma <i>A. Yu. Didyk, I. V. Borovitskaya, R. Wisniewski, V. S. Kulikauskas, V. Ya. Nikulin, and P. V. Gorshkov</i>	18
Study of the Gradual Degradation of ZnSe-Containing Multilayer Nanostructures—Active Elements of Electron-Beam and Optical Pumping Lasers <i>M. M. Zverev, N. A. Gamov, E. V. Zhdanova, D. V. Peregudov, V. B. Studyonov, S. V. Gronin, I. V. Sedova, S. V. Sorokin, and S. V. Ivanov</i>	23
Photoelectron Characteristics of Diode Structures Based on Quantum-Well GaAs/InGaAs Heteronanostructures with a Mn δ -Doped Layer <i>S. V. Tikhov, I. A. Karpovich, and V. G. Testov</i>	27
Correlation Between the Size and Photoluminescence Spectrum of Quantum Dots in InAs-QD/GaAs <i>L. S. Lunin, S. N. Chebotarev, A. S. Pashchenko, and S. A. Dudnikov</i>	36
Implementation of the Regularization and Cumulant Techniques for Interpreting and Modeling Analytical Signals <i>R. Z. Deyanov, A. A. Ischenko, A. I. Kamenev, A. M. Lebedev, B. M. Shchedrin, and S. Kh. Yagoubpour</i>	41
On the Theory Describing Graphene in an Anomalous-Dispersion Region <i>Z. Z. Alisultanov and R. P. Meilanov</i>	46
Conditions for Generation of X-Ray Cherenkov Radiation during Motion of Charges in Realistic Media <i>V. I. Vysotskii and M. V. Vysotskyy</i>	51
Generalization of a Nonstandard Approach in Dynamic Diffraction Theory to the Case of Deformed Crystal <i>A. A. Dyshekov</i>	56
AES and XPS Studies of a por-Si/SnO _x Nanocomposite Formed Using a Powerful Ion Beam of Nanosecond Duration <i>V. V. Bolotov, E. V. Knyazev, V. S. Kovivchak, A. A. Korepanov, P. M. Korusenko, S. N. Nesov, and S. N. Porovoznyuk</i>	62
Changes in the Optical and Electrophysical Properties of Langmuir Films of Liquid Crystals upon a Ferroelectric Phase Transition <i>V. B. Zaitsev, N. L. Levshin, S. V. Khlybov, and S. G. Yudin</i>	67
Self-Organization of Structures on a Bismuth Single-Crystal Surface in an Atmosphere of Atomic Hydrogen <i>O. I. Markov, Yu. V. Khripunov, V. F. Kharlamov, and D. A. Korostelev</i>	72
Investigation into the Adsorption of Atomic Nitrogen on an Al ₂ O ₃ (0001) Surface <i>K. K. Abgaryan, D. I. Bazhanov, and I. V. Mutigullin</i>	76
Application of a Scanning Electron Microscope in Simulating a Beta-Emission-Induced Current <i>M. A. Polikarpov and E. B. Yakimov</i>	81

Radiation Stability of Nanoscale Ferromagnetic Memory Elements <i>V. M. Astashyinski, I. L. Doroshevich, N. T. Kvasov, Yu. A. Petukhov, A. V. Pun'ko, and V. V. Uglov</i>	85
On the Fatigue Strength of Grade 20Cr13 Hardened Steel Modified by an Electron Beam <i>Yu. F. Ivanov, D. A. Bessonov, S. V. Vorob'ev, V. E. Gromov, K. V. Ivanov, Yu. A. Kolubaeva, and V. Ya. Tsellermaer</i>	90
Increase in the Fatigue Durability of Stainless Steel by Electron-Beam Surface Treatment <i>V. E. Gromov, Yu. F. Ivanov, V. V. Sizov, S. V. Vorob'ev, and S. V. Kononov</i>	94
On Determination of the Structural Parameters of Polydisperse Magnetic Fluids by Small-Angle Neutron Scattering <i>A. V. Nagornyi, V. I. Petrenko, M. V. Avdeev, L. A. Bulavin, L. Rosta, and V. L. Aksenov</i>	99
Neutron Diffraction Study of the Nano-Inhomogeneities of the Sphalerite Crystal Structure Induced by Magnetoactive 3d Ions in II–VI Solid Solutions <i>V. I. Maksimov, S. F. Dubinin, and V. D. Parkhomenko</i>	105
Photoemission Spectroscopy and Microscopy of <i>n</i> -, <i>p</i> -GaAs(110) Homostructures <i>N. Yu. Svechnikov</i>	113
Determination of the Thickness of a Gold Layer Deposited onto Silicon via Reflected Electron Spectroscopy <i>V. P. Afanas'ev, P. S. Kaplya, and I. A. Kostanovskiy</i>	123
Focusing of Atomic and Molecular Particles upon Channeling in Chiral Carbon Nanotubes <i>I. V. Lysova</i>	130
Dependence of Optical Properties and Radiation Resistance on the Granule Size of Zinc Oxide Powders <i>M. M. Mikhailov</i>	133
Synthesis and Characterization of Palladium Nanoislands on the Silicon Surface <i>A. S. Yanovsky and S. V. Tomilin</i>	140
The Surface Inhomogeneity of Ion-Exchange Membranes by SEM and AFM Data <i>V. I. Vasil'eva, N. A. Kranina, M. D. Malykhin, E. M. Akberova, and A. V. Zhiltsova</i>	144
Method for the Automated Creation of Panoramic SPM Images <i>S. E. Dogadin, S. I. Leesment, and O. V. Karban'</i>	154
Features of the Energy Distribution of Secondary Particles upon the Ion Bombardment of Graphite <i>V. V. Khvostov, K. F. Minnebaev, and V. E. Yurasova</i>	161
Changes in the Composition of the Surface Layer of Silicon under Sputtering by Oxygen and Cesium Ion Beams <i>A. N. Pustovit</i>	168
Structural Changes in Hadfield Steel under Cold Deformation <i>A. A. Nikulina, A. I. Smirnov, and E. Yu. Velikospel'skaya</i>	172
Study of the Technological Limitations of Photolithography for the Relief Surface of a SOI Wafer during Formation of the Three-Dimensional Micromechanical Structure of an Integral Tensometer <i>L. V. Sokolov, A. A. Zhukov, N. M. Parfenov, and S. O. Igoshin</i>	178
Optimization of the Conditions for Recording Secondary-Emission Signals during the 2D Metrology of Nanostructures <i>V. V. Kaz'miruk and T. N. Savitskaya</i>	181
Effect of Size Quantization of the Reflection Coefficient of an Electron Beam Incident on a Thin Heteroepitaxial Film <i>S. M. Shkorniyakov</i>	187
Kinetics of Aggregations of F_2 , F_3 , X , and Colloid Centers in LiF/Si(111) Films upon Low-Temperature Annealing <i>U. B. Sharopov, B. G. Atabaev, R. Djabberganov, and M. K. Kurbanov</i>	195
