Vol. 10, No. 3, 2016

A simultaneous English language translation of this journal is available from Pleiades Publishing, Ltd.
Distributed worldwide by Springer. *Journal of Surface Investigation. X-ray, Synchrotron and Neutron Techniques* ISSN 1027-4510.

Neutron Diffractometer for Real-Time Studies of Transient Processes at the IBR-2 Pulsed Reactor <i>A. M. Balagurov, A. I. Beskrovnyy, V. V. Zhuravlev, G. M. Mironova, I. A. Bobrikov, D. Neov, and S. G. Sheverev</i>	467
Determination of the Characteristics of the Spectra of Neutron Scattering for Tungsten Using the Wavelet Transform <i>M. A. Goroshko and S. E. Stepanov</i>	480
High-Coercivity Magnetic Mirror Polarizers for Thermal Neutrons <i>D. A. Tatarskiy, B. A. Gribkov, N. S. Gusev, V. V. Rogov, P. A. Yunin, and S. N. Vdovichev</i>	486
Large-Aperture X-Ray Refractive Lens <i>A. N. Artemev and N. A. Artemiev</i>	490
High-Resolution X-ray Diffractometry and Transmission Electron Microscopy as Applied to the Structural Study of InAlAs/InGaAs/InAlAs Multilayer Transistor Nanoheterostructures <i>G. B. Galiev, E. A. Klimov, R. M. Imamov, G. V. Ganin, S. S. Pushkarev, P. P. Maltsev, O. M. Zhigalina, A. S. Orekhov, A. L. Vasil'ev, M. Yu. Presniakov, and I. N. Trunkin</i>	495
X-Ray Photoelectron Studies of Changes in the Electronic Structure upon Phase Transitions in Co-Ni and Co-Fe Alloys <i>I. N. Shabanova and N. V. Lomova</i>	510
Plasma Electrolytic Saturation of Titanium and Its Alloys with Light Elements <i>P. N. Belkin, A. M. Borisov, and S. A. Kusmanov</i>	516
Various Types of Photoactive Behavior of the $Y_3Fe_5O_{12}$ Ferrimagnetic Insulator <i>N. V. Vorob'eva</i>	536
Simulation of a Vacancy Defect at the C(111)- 2×1 Surface <i>O. Yu. Ananina and E. V. Severina</i>	542
Preparation of Thin Anodic Alumina Membranes and Their Utilization for Template Electrodeposition <i>A. P. Leontiev, I. V. Roslyakov, A. S. Vedeneev, and K. S. Napolskii</i>	548
Ranges of Light Ions in Materials with Different Densities <i>Yu. A. Belkova and Ya. A. Teplova</i>	554
Effect of the Capture and Loss of Two Electrons on the Charge Distributions of Ions <i>N. V. Novikov and Ya. A. Teplova</i>	558
Cathodoluminescence Studies of Exciton Diffusion in Gallium Nitride <i>A. N. Polyakov, M. A. Stepovich, and D. V. Turtin</i>	563
Features of Determination of the Surface Roughness Using Scanning Probe Microscopy <i>V. A. Novikov</i>	567
Temperature-Accelerated Molecular Dynamics Simulation of the Evolution of a Low-Energy Incident Cu_3 Cluster on the Cu(100) Surface with a Monoatomic Step <i>E. V. Duda and G. V. Kornich</i>	570
Determining the Potential Based on Rutherford Backscattering Data and Electron Screening in Nuclear Fusion Reactions <i>A. N. Zinoviev and D. S. Meluzova</i>	576
Depth of Origin of Sputtered Particles under the Oblique Incidence of a Primary Ion Beam <i>A. N. Pustovit</i>	579
Passage of Particle through a Cylindrical Structure <i>G. M. Filippov</i>	588
On the Dissolution and Nucleation of Dispersed Precipitates in Ion-Irradiated Alloys <i>V. I. Psarev and L. A. Parkhomenko</i>	593
Formation of Nanoparticles Containing Zinc in Si(001) by Ion-Beam Implantation and Subsequent Annealing <i>K. B. Eidelman, K. D. Shcherbachev, N. Yu. Tabachkova, and V. V. Privezentsev</i>	597
Ionization Effects in Si/SiO ₂ : Li, Na, K Implanted Structures under the Impact of High-Energy α Particles <i>A. F. Zatsepin, E. A. Buntov, A. I. Slesarev, and D. Yu. Biryukov</i>	603

Ferromagnetic Resonance Investigation of Magnetic Anisotropy of Ion-Synthesized Iron-Silicide thin Films <i>A. V. Alekseev, G. G. Gumarov, M. M. Bakirov, V. Yu. Petukhov, and V. I. Nuzhdin</i>	608
Study of the Interaction of Plasma with Fusion Reactor Materials in Linear Simulators with Beam-Plasma Discharge <i>K. M. Gutorov, I. V. Vizgalov, I. A. Sorokin, and F. S. Podolyako</i>	612
Erosion of Carbon Nanotube-Based Polymer Nanocomposites Exposed to Oxygen Plasma <i>L. S. Novikov, E. N. Voronina, V. N. Chernik, N. G. Chechenin, A. V. Makunin, and E. A. Vorobieva</i>	617
Plasma Sputtering of $Pb_{1-x}Eu_xTe$ Films with Varied Composition and Structure <i>S. P. Zimin, I. I. Amirov, E. S. Gorlachev, V. V. Naumov, E. Abramof, and P. H. O. Rappl</i>	623
Deuterium Accumulation in Beryllium under Irradiation with Powerful Pulsed Plasma Flows <i>V. S. Efimov, Yu. M. Gasparyan, A. A. Pisarev, I. B. Kupriyanov, and N. P. Porezanov</i>	627
Multiple Scattering and Inelastic Energy Loss in the case of Ion-Surface Collisions <i>P. Yu. Babenko, A. N. Zinoviev, and A. P. Shergin</i>	633
Analysis of the Composition of Graphene-Oxide Films Using a Backscattered H^+ Ion Beam <i>A. D. Mokrushin, E. V. Egorov, and V. A. Smirnov</i>	637
Structure and Properties of Surface Layers Formed on Zirconium Alloy by Microarc Oxidation <i>L. N. Lesnevskiy, M. A. Lyakhovetskiy, S. V. Ivanova, and O. A. Nagovitsyna</i>	641
Effect of Bias Potential on the Structure and Distribution of Elements in Titanium-Nitride Coatings Obtained by Cathodic-Arc Deposition <i>E. B. Kashkarov, N. N. Nikitenkov, M. S. Syrtanov, A. N. Sutygina, and D. V. Gvozdyakov</i>	648
Tungsten-Oxide Thin Films for a High-Temperature Semiconductor Hydrogen Detector Based on a 6H-SiC Crystal <i>V. Yu. Fominski, S. N. Grigoriev, M. V. Demin, V. V. Zuev, R. I. Romanov, and M. A. Volosova</i>	652
On the Annealing of Radiation-Induced Point Defects in Tungsten <i>S. A. Ryabtsev, Yu. M. Gasparyan, M. S. Zibrov, and A. A. Pisarev</i>	658
Electromagnetic-Radiation Absorption by a Small Conducting Cylindrical Particle with the Mechanism of the Surface Scattering of Charge Carriers Taken into Account <i>I. A. Kuznetsova, D. N. Romanov, and A. A. Yushkanov</i>	663
Effect of Low-Energy X-Ray Radiation on the Electrophysical Properties of Silicon Crystals of <i>n</i> - and <i>p</i> -Type Conductivity <i>L. P. Steblenko, A. A. Podolyan, A. B. Nadtochiy, A. N. Kuryliuk, D. V. Kalinichenko, Yu. L. Kobzar, A. N. Krit, and S. N. Naumenko</i>	672
